Overview

There are no upgrade or backcompatibility issues with the 2.5 series.

2.611 2025-12-14

- Added Bengali i18n
- Fixed corner case job crash on mirror leftovers

2.610 2025-11-27

- Prevent crash and/or inconsistencies when updating site canonical and vhosts. Thanks to @ant-222 for the report.

2.609 2025-11-12

- Prevent leaking of translation titles across instances [SECURITY]

2.608 2025-11-08

- Cleanup stale output files from tree (hard and soft deleted files)
- Fix OAI-PMH error with aggregations

2.607 2025-10-21

- OAI-PMH: expose series and aggregations
- Add /localized URL

2.606 2025-06-24

- Bookcover: bugfix and support image deletion
- Bookcover: add preview
- Bookcover: remove confusing Update button
- Updated i18n: ca and mk
- Turn images with link as caption into hyperlink
- Mirror source: link the landing page instead of the muse file
- Editing: implement footnote analyzer

2.605 2025-03-11

- Add catalan i18n (ca)

2.604 2025-03-02

- Xapian search and indexing: make the search insensitive to diacritics. You should reindex the sites with `amusewiki-bootstrap-archive --xapian` after the upgrade.

2.603 2025-01-16

- Xapian indexing: give more relevance to titles and author
- Upgrade forkawesome to final version
- Improve translation UI

2.602 2024-10-21

- Improve bookbuilder session loading
- Add a max requests to the FCGI process manager

2.601 2024-10-04

- Add new options for federated sites acting as a pure mirror (remove local and vanished files from upstream)

2.600 2024-08-26

- Improve bookcover stock template
- When generating and EPUB in the bookbuild, also produce HTML
- i18n: tr (updated, thanks to @rojenzaman)
